NFL CONFIDENCE ASSISTANT

ONE-PAGE PROJECT MAP / QUICK REFERENCE

2026 | OWNER'S CHEAT SHEET

01 DATA SOURCES

NFLVERSE / NFLREADPY

Schedules, scores, team stats, PBP

THE ODDS API

Pregame market probabilities

SUPABASE

Saved pool picks and confidence

02 PICK'EM ENGINE

Weekly Picks | Admin | Standings

Player Explorer | Pool Insights

Picks + NFL results -> scored master dataset

Core: database, data_pipeline, nfl_results, pickem_analyzer, weekly_picks

03 TEAM ANALYTICS

Team-game stats | League rankings

Situational metrics | Matchup profiles

Core: team_data, situational, rankings, matchups

Terminal tool: terminal_matchup.py

04 WEEKLY WORKFLOW

1 PRE-GAME	Weekly Picks: choose winners and confidence
2 BEFORE KICKOFF	Admin: validate + save player picks
3 AFTER GAMES	Open standings / insights to rebuild results
4 NEXT WEEK	Review team matchups and player trends

05 RUN & MAINTAIN

Launch dashboard	**streamlit run app.py**
Matchup report	**python terminal_matchup.py**

Set SEASON + WEEK in terminal_matchup.py first.

PBP cache: **data/pbp_<season>.parquet**

Refresh is separate from saving picks / viewing results.

IMPORTANT No Admin "Refresh Results" button in uploaded version; analytics pages retrieve results when run.
